

The Leading Digital Cloud Fax Technology

CLOUD-BASED FAXING FOR YOUR BUSINESS

eFax Corporate® is the world's leading enterprise-grade cloud fax solution, providing state-of-the-art Digital Cloud Fax Technology (DCFT) to clients seeking an internet-based alternative to traditional paper-based fax machines.

From small offices to thousands of users across organizations and regions, to customized application faxing via APIs, eFax Corporate® makes it possible to streamline the exchange of business-critical documents and eliminate the costly infrastructure of an in-house fax network.

Fax by email, API, mobile app, or web portal – our solution is convenient, highly secure, and reliable. As a HITRUST CSF Certified® platform, we meet the highest compliance levels required by heavily-regulated industries. A highly-secure document exchange platform, eFax Corporate offers TLS information transport and data encrypted in transit and at rest, meeting HIPAA, PCI, and TruSight requirements.

Our platform's specialized tools, such as the eFax Router, help automate client business processes and workflow, delivering a strong return on investment, improving worker productivity, and promoting goals of interoperability for secure document exchange.

eFax Corporate is powered by a network of secure data centers and colocations distributed across Europe, North America, Europe and Asia, providing unmatched reliability and redundancy. Our send and

receive services provide one of the highest SLAs in the industry, delivering unmatched system uptime, transparent performance metrics, and improved document workflows to millions of customers every day.

EFAX CORPORATE BENEFITS

Enhanced Productivity: eFax Corporate is ideal for companies with high-volume faxing, remote staff, and mobile sales professionals. Employees receive faxes as email attachments anywhere Internet access is available.

Ease of Integration: eFax Corporate integrates natively with major desktop and enterprise applications, including Microsoft Outlook, Microsoft 365, SAP, and Gmail. Your employees can start using eFax Corporate immediately with minimal training. In addition, eFax Enterprise API allows direct integration of cloud fax capability within your applications.

Reliable and Secure Fax Network: The eFax Corporate global network is protected by firewall, redundancy, and security technologies that ensure a 99.5% uptime, rapid delivery times, and unparalleled transmission security.

Redundancy of Critical Elements: Our redundant servers, connections, storage points, and transport network provide superior protection that will compensate for the loss of a single colocation.

Largest Selection of Fax Numbers Worldwide: Local and toll-free fax numbers are available throughout our network, in more than 49 countries on six continents.

Enhanced Features: Many of our advanced features help users meet compliance and security regulations. We also offer specialized tools to improve specific workflows, such as eFax Messenger and eFax Sendit.

Administration: The Corporate Admin online tool lets you manage users, groups, permissions, generate reports, and view logs.

Cost-Effective Faxing: Our solution is an ecofriendly, pay-for-usage alternative to analog fax machines and in-house fax servers; it requires no additional software, dedicated IT resources, or paper handling.

EFAX CORPORATE TOOLS

eFax Enterprise API

- For rapid, high volume faxing
- Fax API: send, receive, list, delete, view
- Admin API: manage and create users, view lists, and download usage reports

eFax Router
